FOUNDER · MOTHER OF 3 · RUNS 3 COMPANIES WITH AI

WELCOME

Hi, I'm *Lisa.*

I run 3 companies with AI: VIXA, a dating clarity app for women, Havenly, a Gen Z makeup remover wipe brand, and LUMAPROMPT.AI, a prompt library for women. I don't have a tech team. I have a laptop, a lot of coffee and a set of shortcuts I use every single day.

This pack is those shortcuts. One night I typed /BILLBOARD into ChatGPT, uploaded a photo of my Havenly wipes, and had a billboard ad in seconds. That's what these codes do: they turn 1 word into a finished first draft.

The honest truth about ChatGPT codes

Most codes are not secret settings. They are shorthand that ChatGPT understands. That's great news, because it means you can make them work the same way every time. Page 4 shows you how.

How to use any code

1. Copy the prompt under the code.
2. Replace everything in [brackets] with your details.
3. Upload a photo or file if the code needs one.
4. Send it, then ask for changes in plain words.

The 1 rule above all: AI is fast, not always right. Read every claim, price and fact before you post or send anything.

WHAT'S INSIDE

50 codes, *5 areas*

1	Marketing and content	12 codes
2	Sales and customers	9 codes
3	Operations	10 codes
4	Strategy and money	9 codes
5	Writing and editing	10 codes
6	Make ChatGPT follow your codes	Template

Tip: start with 5 codes you'll use this week. A few codes you use daily beat 50 you never try.

THE SETTING THAT MAKES IT STICK

Teach ChatGPT *your codes*

Paste this into ChatGPT: Settings, then Personalization, then Custom instructions. Free accounts allow about 1,500 characters, so keep your top 5 to 10 codes there and the rest in a note.

> MY CODES
> When I start a message with one of these codes, follow its meaning:
> /CAPTION = 3 social captions, each with a different hook, under 150 words.
> /SOP = step by step instructions, 8 steps or fewer, 6th grade reading level.
> /FOLLOWUP = a short, warm follow up message that ends with 1 clear question.
> /CRITIC = honest feedback, the 3 biggest fixes first, no compliments.
> /MYVOICE = rewrite in my voice: [3 words that describe how you talk].
> If I use a code that is not on this list, tell me what you think it means before you answer.

The last line is the most important one. It stops ChatGPT from quietly guessing wrong.

1 MARKETING AND CONTENT

Marketing and content *codes*

01 /BILLBOARD

Turns a product photo into a billboard style ad.

COPY AND PASTE

/BILLBOARD for my [product]. Brand name: [brand]. Colors: [colors]. Tagline: [tagline]. Put the product photo I uploaded on the right side. Do not add any claims I did not give you.
